Graphical User Interface EVM-Client

Graphical User Interface > EVM-Client

Consistent handling of our EVM solution through a convenient and state-of-the-art graphical user interface.

Technology

The client is based on the latest and most sustainable technology (Eclipse-RCP, Java, and XML).

Besides the possibility to adapt screen layouts individually, you may even embed any link desired (so-called HotSpots) into the application (e.g. for management of addresses: link to Google Maps, Voucher display: link to the optical archive, Master Data Management: link to documentation of guidelines, etc.).

At the push of a button, all data available on screen can be transferred into Microsoft Excel® for further processing at any time.

Query Manager

The integrated Query Manager allows you to create and administrate user-specific database queries in an easy and convenient way.

Ergonomics

As a „Power User“, the application can almost entirely be operated using the keyboard.

Manifold possibilities of creating individual favorites and freely definable ShortCuts for frequently needed applications complement our concept of user-friendly operation.

Application Platform

As central application platform, both local and server-based third-party applications as well as browser-based web applications can be integrated into the client.

System Services

Each important system service of the IBM i5/ Power Systems has been seamlessly integrated into the client (pools, jobs, messages and printers).

The screenshot displays the EVM-Client interface for 'PD PORTOLAN Demo GmbH'. The main window is titled 'Voucher entry' and contains the following data:

Posting date/code	19.08.2009	/	210	Creditor Invoice man
Voucher date/number	19.08.2009	/	21000350	
Ext.vouch.date/no	17.08.2009	/	99998	

Account assignment details:

Vendor	40010	C	Goerke Ingenieurbuero GmbH	5.796,00 -	
GLD acc		D			
Amount/Cur/Rate/LC	2.500,00	EUR	Euro	1,00000	2.500,00
Tax amount / code	399,16	019	19% Input VAT		2.100,84

The 'Value display' window shows a table with columns: Eval.area, Year, TOT, SOC, DEP %, RPU/AMC, accum. DEP, Net book value, Description, and Descrip. The table contains data for years 2009 and 2010, with values for TOT, SOC, and DEP %.
