Online Reporting

The Enterprise Business Portal PortoWeb from PORTOLAN enables you to use financial reporting world-wide. All you need is a PC or a notebook with internet access.

These are the advantages of PortoWeb within Reporting:

- > Fast access to current business data (real-time)
- > Site-independent call-up of reports via browser
- > User-specifically prepared information
- > User-friendly analyzing functions
- > Possibility to drill down to the lowest voucher level
- > Direct integration of your optical archiving system

A role-based and personalized user concept prepares the required information clearly and in a structured manner. Even without a detailed knowledge of the financial application, you can navigate down to any desired level of information.

PortoWeb2 - Architecture

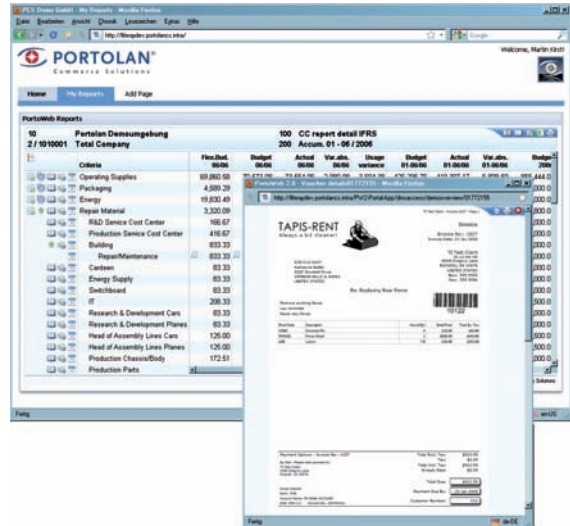

Portal Technology with individual Contents

In addition, PortoWeb as a portal offers much more than this. You can individually compile the contents of your reports, especially tailored to your needs. By using state-of-the-art technologies, the integration of any web-enabled application can be guaranteed.

Maintenance efforts will be reduced to a minimum. By using a standard browser, no client installation is required.

At the click of your mouse you obtain the PORTOLAN EVM reports edited for you.

Overview of Benefits:

- > Mobile access to current datasets.
- > Personalized and role-based presentation
- > Simple, quick and intuitive handling
- > User-friendliness through web-enabled user interface
- > No application knowledge needed
- > Flexible navigation within PORTOLAN reports, down to transaction level
- > Integration of further applications and documents
- > Direct access to optical archives
- > Direct transfer of reports into MS EXCEL
- > Data security through SSL coding
- > Increased security and easier handling through Single Sign-on
- > Lowest possible maintenance effort
